PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, 2026) with hands-on experience building end-to-end AI/ML pipelines and deploying production-ready APIs using Docker and Kubernetes. Skilled at taking prototypes to enterprise-deployable solutions, with strong programming fundamentals and a hands-on, empirical approach to debugging. Foundational understanding of AI agent architectures, orchestration, and LLM concepts from self-directed study, with proven cross-functional collaboration to deliver measurable impact. Actively expanding into Generative AI, agentic systems, and cloud platforms (Azure/AWS/GCP).

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, HTML, CSS

AI/ML Engineering: AI Pipelines, Machine Learning, Predictive Modeling, Model Evaluation, Model Deployment, REST API Development, Containerization, Feature Engineering, EDA, Classification, Regression

AI Agents & LLM Concepts (Foundational): AI Agent Architectures, Agent Orchestration Concepts, LLM Fundamentals, Prompt Engineering

Libraries & Frameworks: Pandas, NumPy, Scikit-Learn, XGBoost, Flask, FastAPI, Matplotlib, Seaborn, Streamlit

Tools & Platforms: Power BI, MySQL, Git, GitHub, Docker, Kubernetes, Render, MLflow, Jupyter Notebook, VS Code

EXPERIENCE

Data Science Intern

Jun 2025 – Aug 2025

Celebal Technologies

Remote

- Applied data preprocessing, feature engineering, and machine learning techniques on real-world datasets to build predictive models for fraud detection and customer segmentation, improving model accuracy by 15%.
- Built and evaluated classification and regression models using Python (Scikit-Learn, Pandas, NumPy), reducing the false positive rate in fraud detection by 20%.
- Performed exploratory data analysis (EDA) and statistical data visualization to uncover patterns and communicate actionable insights to stakeholders.

Frontend Development Intern

Aug 2024 – Sep 2024

Mission Minded Foundation

Jaipur, Rajasthan

- Developed 5+ responsive, interactive web pages using HTML, CSS, and JavaScript, improving cross-browser compatibility across Chrome, Firefox, and Edge.
- Collaborated with the design team to implement UI components, reducing page load time by 10% through code optimization.

IoT Intern

Aug 2023

PIET AICTE IDEA LAB

Jaipur, Rajasthan

- Built a real-time monitoring and alert system with Arduino and ESP32, reducing detection delay to under 2 seconds.
- Integrated temperature, motion, and gas sensors for 24/7 automated monitoring, achieving 98% uptime on a live prototype.

PROJECTS

Smart Loan Default Prediction System | Python, XGBoost, Flask, FastAPI, MLflow, Docker, Kubernetes, Render

- Built an end-to-end machine learning pipeline using XGBoost and Random Forest on large-scale loan datasets, including data preprocessing, feature engineering, class imbalance handling, and model evaluation using ROC-AUC.
- Developed REST APIs with Flask and FastAPI for real-time loan risk prediction; containerized with Docker and deployed via Kubernetes on Render for production-ready inference.

Physiotherapy Case Management & Analysis System | React.js, Node.js, Express.js, MySQL

- Developed a full-stack web application to manage 100+ patient records, track treatment sessions, and visualize recovery trends using React.js, Node.js, and MySQL.
- Built data visualization dashboards to monitor pain, mobility, and strength parameters, enabling data-driven clinical decisions and reducing manual reporting time by 40%.
- Designed secure authentication using JWT and bcrypt; optimized SQL queries for patient data retrieval, achieving response times under 200ms.

Instructor Effectiveness Prediction | Python, Pandas, Scikit-Learn, Random Forest, EDA

- Developed a machine learning project to predict instructor effectiveness using learner outcome, engagement, and feedback data.
- Performed EDA and created an Instructor Effectiveness Score by aggregating batch-level data to the instructor level.
- Trained a Random Forest model and evaluated its performance using standard classification metrics.

EDUCATION

B.Tech, Computer Science and Engineering — CGPA: 7.4/10

2022 – 2026

Poornima Institute of Engineering and Technology, Jaipur, Rajasthan

Higher Secondary (Class XII) — 67.40%

2022

Government Senior Secondary New Building School, Sirohi, Rajasthan

CERTIFICATIONS & ACHIEVEMENTS

- SQL for Data Science — Udemy Certification (2024)
- G20 Summit Hackathon Participant (2023)
- Young Indians Debate Competition — Public Speaking Award (2023)
